

**VENKATESWARA RAJU KALIDINDI,
Ph.D.**

Assistant Professor

Research Interest:

Our current research mainly focuses on filing Dossiers for Drug Regulatory Approvals like NDA, ANDA, SNDA, INDA and preparing documentation for complying with country specific requirements to be able to export Pharmaceutical Products. To stress need of proper regulations for medicines to ensure the quality, safety, and efficacy of the drugs because a smallest of the mistake can end up recalling the product, leaving several millions at loss for the company. To create awareness about how regulatory affairs in the pharma industry has a crucial role to play in all phases of drug development, drug approval, and marketing, in compliance with the norms, regulations, and guidelines. To ensure that the company's drugs and products comply with the existing regulations and makes sure the entire product range is kept up to date with the changing legislative practices. We also inform about the legal and scientific restraints, limitations, and requirements regarding the product and help companies collect, collate, and evaluate scientific information generated by the R & D department. In today's competitive environment, a proper conduct of the regulatory affairs activities is vital for the company's success and sustainability of its products. The regulatory affairs in the pharma industry are what provides physicians and other healthcare professionals with a comprehensive and accurate information about the quality, safety, and effectuality of the drug/product. As the healthcare industry is growing tremendously, it is necessary for the healthcare professionals to be equipped with industry knowledge along with their academic/technical skills and abilities

Specialization: Pharmaceutical Regulatory Affairs

Experience: 11.5 Years
